Student Comments**What did you find MOST helpful about Josemari Feliciano's teaching approach and course content?**

| Comments |
|--|
| Jose was an amazing teacher! I've never taken anything like data science before and was genuinely so blown away and appreciative of how helpful and comprehensible he made the course. He offered lots of office hours, individualized support and made the lecture materials ridiculously easy to follow (given how hard they could have been to explain otherwise.) also gave lots of real-world data science insights. |
| I learned a lot of techniques and skills from this class. The structure of classes and content was presented well. The pace of the class was also good which allowed to build on previous techniques we learned. |
| Professor Feliciano is really friendly and was helpful when I had questions in class. He is clearly an expert on data science, and that was really impressive. |
| Professor Feliciano made course content simple and easy to understand. I learned so much from him. The assignments in this class were challenging but interesting and encouraged me to want to learn more about data science. |
| I really enjoyed this class as someone who is a Data Science minor. Professor Feliciano provided a very interesting industry perspective on foundations of data science. He taught it in such a clear and concise way with in class practice that was tangible and useful for job interviews and practical applications. He was always very open to questions and the class felt comfortable asking him for academic or professional help. |
| His organization |
| very clear notes posted. |
| The structure and presentation of the class is super clear. The homework follows what is taught in class. All resources are available and very helpful. |
| INCREDIBLY thoughtful professor and a great teacher. He explained things amazingly. |

What did you find LEAST helpful about Josemari Feliciano's teaching approach and course content?

| Comments |
|--|
| He was a great teacher, nothing wrong! |
| Everything in this course was useful and helpful. Every class I learned something new that I knew I could apply to research and data work from visualization map making and other skills. |
| In class lectures were not very interactive, so it might have helped me to do more varied types of learning (nitpicking here). |
| I wish we could have gone more in depth on some topics. But I understood that this was a basic survey class and the objective was to give us base level knowledge in lots of areas. I have no complaints other than that this class was wonderful. |
| N/A |
| N/A He is a great professor. |
| I kind of wish there were more of an opportunity to do a project or something, go somewhere we wanted with the data (even if just in a small way!) |
